Category Information Centre

Specialists in category theory agreed at their meeting on the occasion of the International Mathematical Congress, August 1966, to establish a Category Information Centre (CC) in order to inform its participants about new results, problems, literature and other topics concerning category theory or the participants of CC.

All participants are requested:

1. To inform the CC of any change of address,
2. to notify the CC in the form described below, when submitting new papers and - if possible - to enclose a preprint,
3. to send to CC - if possible - one preprint or reprint of each of their paper concerning category theory,
4. to supply to the CC any information, which may be useful to the participants (problems, announcements of meetings etc.).

The CC will communicate all this information to its participants.

Sample notification to illustrate 2.:

V. Trnková, Universal Categories, sub.Comment.Math.Univ.Carolinae. - A category (concrete category) is constructed in which every category (concrete category) can be fully embedded.

Those interesting in joining are requested to send their names and addresses to the CC together with a list of their publications concerning category theory, and description of their submitted papers (see example above).

Correspondence should be addressed to:

Category Information Centre

Sokolovská 83, Praha 8

Czechoslovakia

S. MacLane

President of CC

Z. Hedrlín

Secretary of CC
