Editorial comment on the paper Huashui Zhan, Junning Zhao: Some remarks on Prandtl system

EDITORIAL COMMENT ON THE PAPER
HUASHUI ZHAN, JUNNING ZHAO:
SOME REMARKS ON PRANDTL SYSTEM

At the moment the paper [1] was ready for printing, the authors decided to withdraw their manuscript. By an unfortunate coincidence, the communication between the authors and the Editorial Office of Applications of Mathematics was interrupted for some time, and the authors' message arrived only when the article [1] had already been printed and it was technically impossible to cancel its publication. The authors wish to make the following declaration:

1. Huashui Zhan, the first author of the paper, bears full responsibility for its mathematical content.

2. The main problem (Problem 4 in the paper) had already been solved in the book [2], only some steps in the proof had been omitted there.

Both the authors and the editors are very sorry for this misunderstanding.
